

## Online Cyber Security Course Pricing

MetrixCloud's e-learning platform consists of two training courses designed to give all levels of staff an understanding of cyber-crime, how it occurs and actions to prevent it.

### Course One £50 per person:

2 hours of flexible e-learning consisting of 5 Lessons covering:

#### 1. Cyber World – Here Be Monsters

Internet and cyber security history, understanding the motivations of cyber criminals and recognising that cyber security is not all about IT.

#### 2. Money, Money, Money – the Economics of the Cyber World

Understanding the value of information in the digital economy and the (financial) motivations of cyber-criminals.

#### 3. PIP Model

Understanding your cyber security risks through the PIP Model: People, IT & Processes/Physical.

#### 4. Attack Vectors

Evaluating direct and indirect cyber attacks. Recognising threats in your inbox. Understand what to do if you are hacked.

#### 5. Physical Security While Out & About

Identifying cyber security dangers while out and about and learning how to limit damages due to theft.

### Course Two £50 per person:

2 hours of flexible e-learning consisting of 4 Lessons covering:

#### 1. People Threats & Vectors

Identifying people vectors, how attacks happen and understanding how these threats overlap with each other.

#### 2. Triggers & Behaviours

The key to understanding the relationship between social engineering and risky behaviours.

#### 3. Three Dimensions

Recognising vulnerabilities across the 3 dimensions (biological, cognitive and psychological).

#### 4. Situation & Disposition

Learning how the situation and your disposition affects your reaction to triggers. Recognising your personality traits and how this might make you more or less vulnerable.

### Free PREMIUM RESOURCES

With every course purchased, you will have access to our premium resources at no extra cost...knowledge-base support from our experts as well as groups and forums for social learning.
